## (54) PROPYLENE RESIN COMPOSITION AND CAR INTERIOR MATERIAL USING THE SAME

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a propylene resin composition having good appearance, low gloss and excellent shock resistance and car interior materials using the same.

SOLUTION: This propylene resin composition comprises (A) 50-99wt.% of a propylene resin comprising (1) (a) 70-80wt.% of fraction insoluble in p-xylene at 23° C. (b) 30-2wt.% of fraction soluble in p-xylene at 23° C; having (2) (a) the relaxation time  $(\tau)$  of the component of 0.01-0.35 second and the molecular weight distribution index (PDI) of 1-18, (b) the intrinsic viscosity  $[\eta]$  of 2.0-10dl/g and the ethylene unit content of 1-20wt.%; (B) 1-15wt.% of an ethylene-4-18C α-olefin copolymer with a density of 0.850-0.875/cm3 and MI of 0.01-25g/10min and (C) 0-35wt.% of talc. Further, interior parts for cars are produced by injection molding of this resin composition.

## LEGAL STATUS

[Date of request for examination]

27.03.2003

[Date of sending the examiner's decision

of rejection]
